BACKGROUND

2023.09-2027.06 (Expected) Central South University of Forestry & Technology | BSc Finance GPA 3.4/4.0

Languages & Certificates: CET-6 580+ (working proficiency); Junior Accounting Title (Accounting Practice, Economic Law).

Strengths: 1. Requirement discovery: define users, pain points and product scope from interviews; deliver PRDs. 2. Hands-on AI delivery: run 0→1 projects across scenarios. 3. Data closed loop: turn complex data into decision-ready assets.

Portfolio: <https://gaibian005.github.io/portfolio/>

INTERNSHIP EXPERIENCE

Guangdong COROS Sports Technology Co., Ltd. Finance Digitalization Specialist | May-Aug 2026

Digital Product: As the product manager, took part in an overseas expense control system end to end, from kickoff to UAT acceptance; **owned phase-1 requirements, solution**

design and master-data migration. Aligned the new system's PRD requirements with engineering; mapped module flows and hierarchy; defined features and goals; delivered the product solution; cleaned and restructured legacy documents.

Accounting Automation: Scoped needs, business risk and tech routes; **landed 8 requirements, cutting work time by 80%.**

AI Adoption: Drove rollout of in-house and proven AI tools for finance users; wrote **9 knowledge-base guides.**

Shanghai Dewu Information Group Co., Ltd.

AI Operations Intern | Nov 2025 - Jan 2026

Market Analysis: Tracked LLM, agent and tooling market trends and dev routes; published weekly/monthly reports.

Project Management: Drove agile delivery of AI products and automation tools; wrote **5 rollout training cases.**

Tianzhi International CPA (Hunan)

FMCG IPO Audit Intern | Jun-Sep 2025

Control Testing: Supported AR/AP working papers; ran circular walkthrough tests (document → business → source voucher → journal → sub-ledger → GL → report) to trace multi-entity finance data from operations to statements.

Risk Identification: Standardized finance data for due diligence; flagged rebate and related-party control gaps.

PROJECT EXPERIENCE

Tencent AI Bootcamp: Licaitong Mobile Insight Assistant

Product Manager | Aug-Sep 2026

Key Results: Defined product form & differentiation, designed the user flow, shipped a hi-fi prototype and test plan.

Users & Pain Points: For non-expert users of a wealth app who see watchlist moves but cannot grasp why in minutes.

Product Definition: Explain professional data in plain language; surface ignored price, flow and sentiment signals.

Operating Design: Built a pipeline (data → rules → RAG evidence → LLM attribution → compliance check → dialogue → human review → feedback) with 3 evidence tiers and red-line fallbacks against hallucination and alert fatigue.

Interactive Prototype: Launched a high-fidelity clickable prototype: <https://gaibian005.github.io/Interactive-prototype/>

Test Plan: Defined test framework and rollout criteria: L3 for staged rollout, L4 with ≤4% complaints for launch.

Document Master-Data Extraction & Cleanup

Data Owner | May-Aug 2026

Key Results: Loaded 85%+ of invoice and contract records, 90%+ of supplier data and 70%+ of in-transit contracts, drawdown write-offs and exceptions into the master-data hub, **saving 1-2 months of finance workload.**

Background: In-transit documents had no master-data control; go-live would have meant heavy manual upkeep.

Solution & Deliverables: Python and SQL, SQLite database; AI tools Codex, Gemini, related skills and external plug-ins.

Architecture: Split rules into 11 layered parallel sections, cutting DB write contention and model hallucination.

Data Mining: Used text-layer extraction, OCR and multimodal parsing on 10k+ files; mapped JSON output into SQLite.

Cross-check: Matched records by MD5 hash, file size, text content and SAP links; **dual-flow match rate hit 80%+.**

Rebuild & Output: Scripts plus LLM semantic checks rebuilt data into JSON and Excel for the master-data hub and audit.
